

## TOTAL SOLAR ECLIPSE 2024

On April 8, 2024, a total solar eclipse will plunge much of Indiana into momentary darkness. Excitement and interest are growing for the big event, and our Town and public safety officials are planning for the influx of hundreds of thousands of visitors to the state.

Timing of the Eclipse:

- Partial Eclipse: 1:50pm to 4:23pm
- Total Eclipse: 3:05pm to 3:09pm

In preparation for the expected surge in visitors, the Town has made the decision not to host an organized viewing party. Instead, we encourage local residents to experience the eclipse from the comfort of their own homes to avoid the crowds and traffic.
